Date: January 1st, 2011

Description

For David A Warner, everything around him was fading. He lost awareness—finding himself, seconds later, waking into darkness. With his heart racing, being covered in sweat and experiencing memory loss, he ran for his life out of his brothers dark basement room. Running upstairs and down the hallway towards his bedroom, a flicker of memory ignited the event—striking like lightening. He immediately froze—with chilling vibrations moving up and down his spine—acknowledging his first out-of-body experience (OBE).

On July 27, 1987 he experienced an event that forever changed his way of thinking and maturity—such that included life after death, self-realization, and a spiritual awareness. This has helped him facilitate in-depth documenting, and scientific research into the OBE. It's definitely a gift from God to explore thousands of experiences and allowing him to share his story.

Author of the web site, InvisibleLight.us, the information that is offered helps bring awareness to the community about what is possible through the OBE consciousness. Invisible Light presents statistics, validations, journals, experiments, upcoming radio interviews, video, for visitors to explore and more.

The key ingredient to having a successful out-of-body experience—as quoted by David—is "Faith, Hope, Love, and Intent will Project You There!"

The following is a list of on-going achievements that have made a difference serving the local and global community.

Achievements

- Ø Hospice volunteer companion to the dying
- Ø A.I.D.S walk activist
- Ø Author of web-site "Invisible-Light.Us"
- Ø Guest radio speaker
- Ø Scientific intuitive studies
- Ø Humanitarian for Foster Care & Adoption
